

CUSTOM ROBOTICS POD

by New Age Industrial

CUSTOM ROBOTICS POD

Designed for use with Automated Storage and Retrieval Systems, New Age Robotic Pods eliminate the need for manual cart transport. Pods streamline order picking and fulfillment processes, improving efficiency and overall employee health and safety.

Slant Shelves allow users to see inside totes easily, and the unique angle pulls items forward, minimizing reaching, reducing repetitive motions and injuries.

Why Aluminum?

Aluminum is durable, but lightweight enough that robots and other specialized machinery can move our loaded equipment without exceeding weight limits.

Pods are easily customized to meet the needs of your ASRS.
