

T-Bar Wall Shelves are sturdy without being bulky or heavy, making them an excellent option for any area. The slats allow air to circulate to stored items, the "T" tops provide a smooth surface that allows items to slide for easy loading and unloading. Each "T" is secured to the framework with three welds, ensuring maximum stability and durability!

Available in various sizes and styles.

Slant

Solid Wall Shelves are an excellent option for storing smaller, lighter items. Available in standard, .063" thick, 18 gauge aluminum sheet or heavy duty, .080" thick, 12 gauge.

1125A

All solid wall shelves have a 1/8" raised marine edge that provides additional strength and stability.

The Marine edge also contains small leaks and spills. Perfect for oils, spices, or cleaning products!

Shelves are shipped "knocked down" and are easily assembled by end users.

Shelves are attached to the wall via a 1/2" piece of angle. Because walls are constructed differently, users must drill holes and supply their own hardware based on wall construction and materials.
